

IKNL (Netherlands Integral Cancer Institute)

NKR+ : updating of the Netherlands Cancer Registration

July 2014

Data in oncology

Data in oncology

MDO (1) : 100.000 patients/year

MDO (2) : ??? patients/year

Uniform in hospital presentation of patient data

Digitalising of guidelines

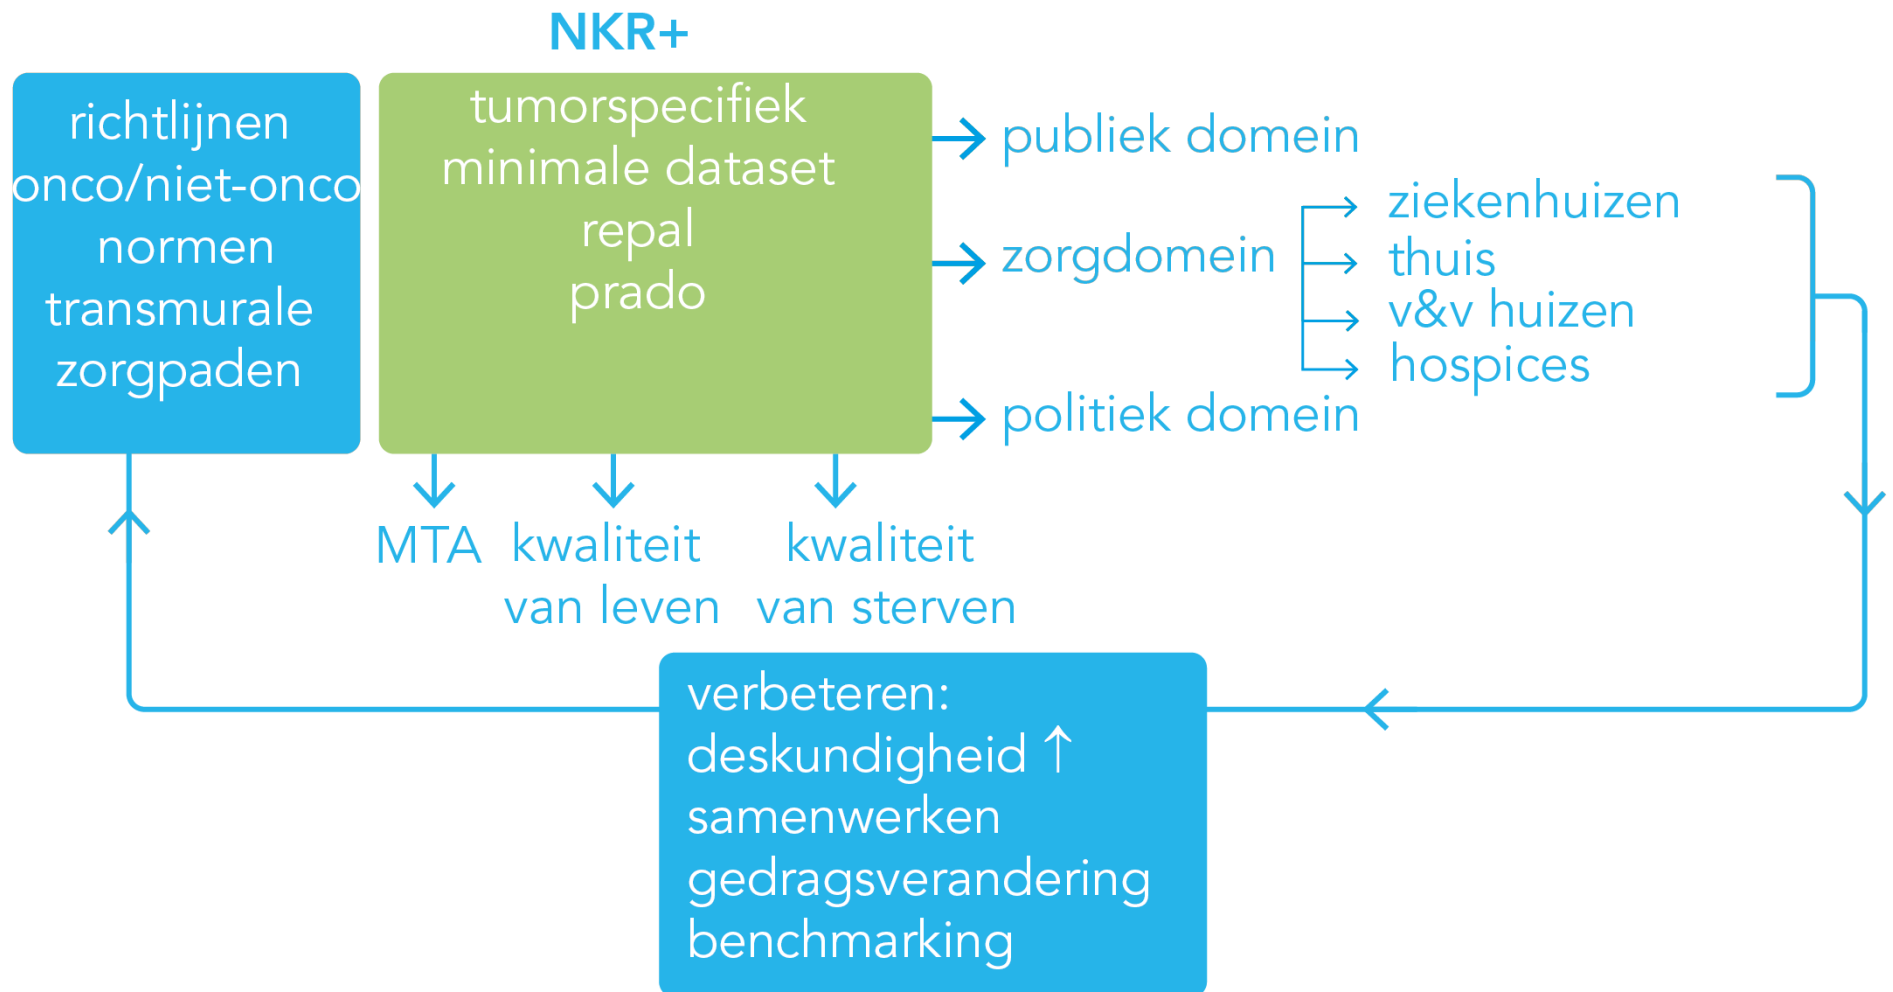

Uniform documentation of MDO's

National database with expert defined datasets

Oncology

Palliative care

Facts and figures IKNL

- by:
 - 140 NKR datamanagers, 70 study datamanagers,
 - 50 advisors, 40 researchers, 20 guidelines developers
- with:
 - 400 consultants for clinical oncology
 - 200 consultants for palliative care
 - 10.000 professionals in networks and working parties

Audits and population based registry

Audits according to DICA :

- registration by medical specialist of specific medical intervention
- short cycling reports to individualised specialist and hospital

Audits and population based registry

Population based registry NKR :

- registration by datamanagers of all relevant data from diagnosis to death or apparently sustained cure
- yearly reports to individualised hospitals and comprehensive cancer networks

Challenges

simplifying presentation of MDO data in order to handle the really ‘ gray ‘ issue of decision making and to accept more data

relating diagnosis data to treatment decisions

relating clinical data to tissue banks and researchprograms
